

IZIP *Zuma* Cantilever and Ladies Cantilever Frame

Advantages & Benefits of a **PAS/TAG** E-Bike

Pedal Assist - Twist & Go

Allows users to select between two modes.

1. PAS Mode: Pedaling w/o throttle gives 50% of available power assist, conserving the battery. Pedaling while Activating Throttle allows user to go from 50% to full power or anywhere in between.
2. TAG: No pedaling required, just throttle from 0% to 100% power

BATTERY

MODE

ELECTRO-DRIVE®

IZIP ZUMA
Also available in
Ladies Cantilever Frame

ELECTRO-DRIVE®

Powerful 500W DC High Torque Brushless Geared Hub Motor

The Advantage.

Powerful brushless hub motor system drives the rear wheel.

The Benefit.

Provides the power you need to climb hills or cut through a head wind.

MODE

TAG/PAS System

The Advantage.

Rider can select between two power assist modes.

The Benefit.

TAG allows you to power the bike without pedaling at all. PAS mode without throttle stretches range and economizes battery usage.

BATTERY

Lithium-ion 36V / 11.4Ah removable rack top mounted pack, Samsung rechargeable cells with advanced battery management system with key lock and power system.

The Advantage.

A little over 1/2 the weight of a conventional SLA battery pack and number of lifetime charges is 3 to 4 times longer.

The Benefit.

Compact package size is easy to detach from the bike when locking outside or transporting. Simply carry inside to recharge.
